

ALTA SCUOLA POLITECNICA

In 2004, the Politecnico di Milano and the Politecnico di Torino launched the Alta Scuola Politecnica (ASP), an international honours program focused on multidisciplinary and innovation. Since then, sixteen cycles of ASP studies have been activated. ASP selects 150 students per year, among the top 5% applicants to Master Degree programmes in Engineering, Architecture and Design at Politecnico di Milano and Politecnico di Torino.

ASP fosters new approaches aimed at developing tailored forms of education, engaging students into personalized learning programs that include innovation projects and residential schools. ASP addresses the formalization of societal problems that are complex and ill-structured, to make students become aware of the complexity of their solutions. Through this understanding, students refine their ability to produce a positive impact on societal and environmental challenges, to become fully responsible and aware of the social effects of each of their design, technological and entrepreneurial acts.

ASP ALUMNI ASSOCIATION

ASP Alumni Association is the network made by students who graduated from Alta Scuola Politecnica. It now counts more than 1500 members spread around the world (primarily Italy, Europe and USA). The declared vision of the ASP Alumni Association's is to inspire and connect talents, to make an impact on society. The association aims therefore to help alumni to build strong, productive alliances within the community. Through the Association, alumni have opportunities to connect with each other as well as with ASP, and to advance their careers through events, career resources, networking, and late-breaking faculty research. This contributes to consolidate friendships tied during the two years of the ASP program, and to create new ones among alumni of different ASP cycles, but sharing the same values.

ASP Mentoring Program

Kick-Off for the 16th Cycle

VIRTUAL EVENT

January 22nd, 2021

Aula Magna

Politecnico di Milano

ASP MENTORING PROGRAM

The ASP Mentoring Program is a joint initiative between ASP and the ASP Alumni Association through which an expert Mentor supports an ASP student in understanding her/his potential and in managing the transition from the university to the first professional experience. The objective of the Program is to develop new forms of tailored education, allowing students to access specific knowledge and experience that could be beneficial for their own future. This initiative enhances the 9-year-long experience developed by ASP Alumni Association in the mentoring field.

To sustain this program, the ASP board and the Alumni Association invite highly qualified managers, academics and ASP Alumni to share their experience with the ASP students and to become part of the ASP Community. Mentors join the Mentoring Program as volunteers.

This unprecedented combination is meant to develop a personal relationship between the Mentee and the Mentor, aiming at personal and professional growth, out of mutual respect and support. Mentors are also warmly invited to take part to ASP activities, like for example lectures during the ASP Schools and Multidisciplinary projects.

EVENTS INFO

In compliance with the regulations issued to contain the epidemiological emergency by COVID-19, the event will be organized as a webinar.

[ASP EVENT - 22/01/2021](#)

ASP 16th Cycle Mentoring Program Kick-Off

17.30

Welcome and introduction: Importance and trends of tailored education

Ferruccio Resta, Rector, Politecnico di Milano

Guido Saracco, Rector, Politecnico di Torino
